

How to setup an iPad Point of Sale

by ARMORACTIVE.

Step 1: Place your cash drawer, receipt printer, and iPad POS in your desired location. Connect the cable from the cash drawer to the smaller input on the back of your receipt printer.

Step 2: Connect an ethernet cable from your wireless router to the ethernet port on the back of your receipt printer.

Step 3: Place your already setup iPad Kiosk on top of the drawer or on your counter. First make sure your wireless signal is broadcasting. Go into the settings on the iPad. First turn on your wifi, and connect to your network.

Step 4: Next launch your iPad Point of Sale App. Go to your settings within the app. Turn on receipt printing, and connect to the correct printer brand. Lastly turn on cash drawer setting. Keep in mind each app will display these settings differently.

Step 5: Test your POS setup. Run a demo cash transaction. The receipt printer will automatically open the cash drawer for you with cash transactions.

Your setup is complete!
